PROFILE

Python Full Stack Developer with hands-on experience building AI-powered web applications and REST APIs using Python, FastAPI, Django, React.js, Next.js, TypeScript, PostgreSQL, and Redis. Experienced in backend service development, authentication, database design, procurement workflows, frontend-backend integration, API testing, and LLM-powered application features. Strong exposure to Docker, AWS, Git, Agile development, and production-oriented application debugging.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, SQL
Backend	FastAPI, Django, Django REST Framework, REST APIs, SQLAlchemy, Alembic, Celery
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Data	PostgreSQL, MySQL, Redis, pgvector
AI / Cloud	LangChain, LLM APIs, Vector Search, AWS EC2
DevOps / Tools	Docker, Docker Compose, Git, GitHub, Swagger, Linux, JWT, pytest

EXPERIENCE

Software Developer Intern – Complyra

Jan 2026 – Present

AI-powered Procurement & Regulatory Compliance Platform

Remote

- Developed Python and FastAPI services for authentication, user management, AI-powered procurement search, product discovery, supplier workflows, and regulatory compliance functionality.
- Designed and integrated REST APIs with React.js, Next.js, and TypeScript, implementing end-to-end frontend-to-backend workflows and protected application features.
- Implemented PostgreSQL-backed business logic for procurement workflows, including database models, CRUD operations, validation, supplier data, and structured application data.
- Contributed to compliance workflows covering 47 global regulations and AI-powered search features using LLM APIs, LangChain, semantic matching, and vector search.
- Worked on supplier discovery, supplier identity matching, RFQ workflows, external platform integrations, and procurement automation features.
- Implemented and debugged JWT authentication, Redis-backed functionality, Docker-based development, API integrations, and Git/GitHub workflows; tested APIs using Swagger and resolved full-stack integration issues.

Full Stack Developer Intern – UVXYZ

Jul 2025 – Dec 2025

E-commerce Application – Eruvaka Foods

Remote

- Developed a Django-based product management dashboard supporting product, category, inventory, cart, and order workflows.
- Implemented Django CRUD operations, model relationships, server-side validation, and business logic for e-commerce application features.
- Built dynamic cart functionality for adding, updating, and removing products with quantity management and workflow validation.
- Designed MySQL-backed data models and performed application debugging, data validation, and frontend-backend integration for e-commerce workflows.

PROJECTS

TaskFlow – Full Stack Task Management Application

Django, Django REST Framework, React.js, PostgreSQL, JWT, Redux, Docker, AWS EC2

- Built a full-stack task management platform supporting task creation, updates, deletion, priorities, deadlines, and user-specific workflows.
- Developed REST APIs with Django REST Framework using JWT authentication, protected endpoints, request validation, and role-based authorization.
- Built a responsive React.js frontend with Redux state management and integrated frontend workflows with backend APIs.
- Designed PostgreSQL models and relationships for users, tasks, priorities, deadlines, and task-management workflows.
- Containerized the application with Docker and deployed it on AWS EC2.

EDUCATION

ICFAI University

2022 – 2026

B.Tech in Data Science and Artificial Intelligence

Hyderabad, Telangana

CERTIFICATIONS

AWS Academy Cloud Foundations | HackerRank Python
